Because of limited testing capacity, the number of cases detected through testing represents only a small portion of the total number of likely cases in the County. COVID-19 data are reported as timely, accurately, and completely as we have available. Data are updated as we receive information that is more complete and will change over time as we learn more. Cases are lab-confirmed COVID-19 cases reported to San Mateo County Public Health by providers, commercial laboratories, and academic laboratories, including reporting results through the California Reportable Disease Information Exchange. A lab-confirmed case is defined as detection of SARS-CoV-2 RNA in a clinical specimen using a molecular amplification detection test. Cases are counted by episode date; episode date is defined as the earliest of: case symptom onset date, sample collection date, date of laboratory result, or date of death. Deaths reported in this dashboard include only San Mateo County residents; death data last updated June 10, 2021.

COVID 19 Vaccinations of San Mateo County Residents as of 6/15/2021

3,699,455 total

829 today

 1.9 new cases per 100K

DEATHS

62,565 total

31 today

 0.04 new deaths per 100K

TESTS

68,098,129 total

109,057 today

 0.9% test positivity

VACCINES ADMINISTERED

40,098,803 total

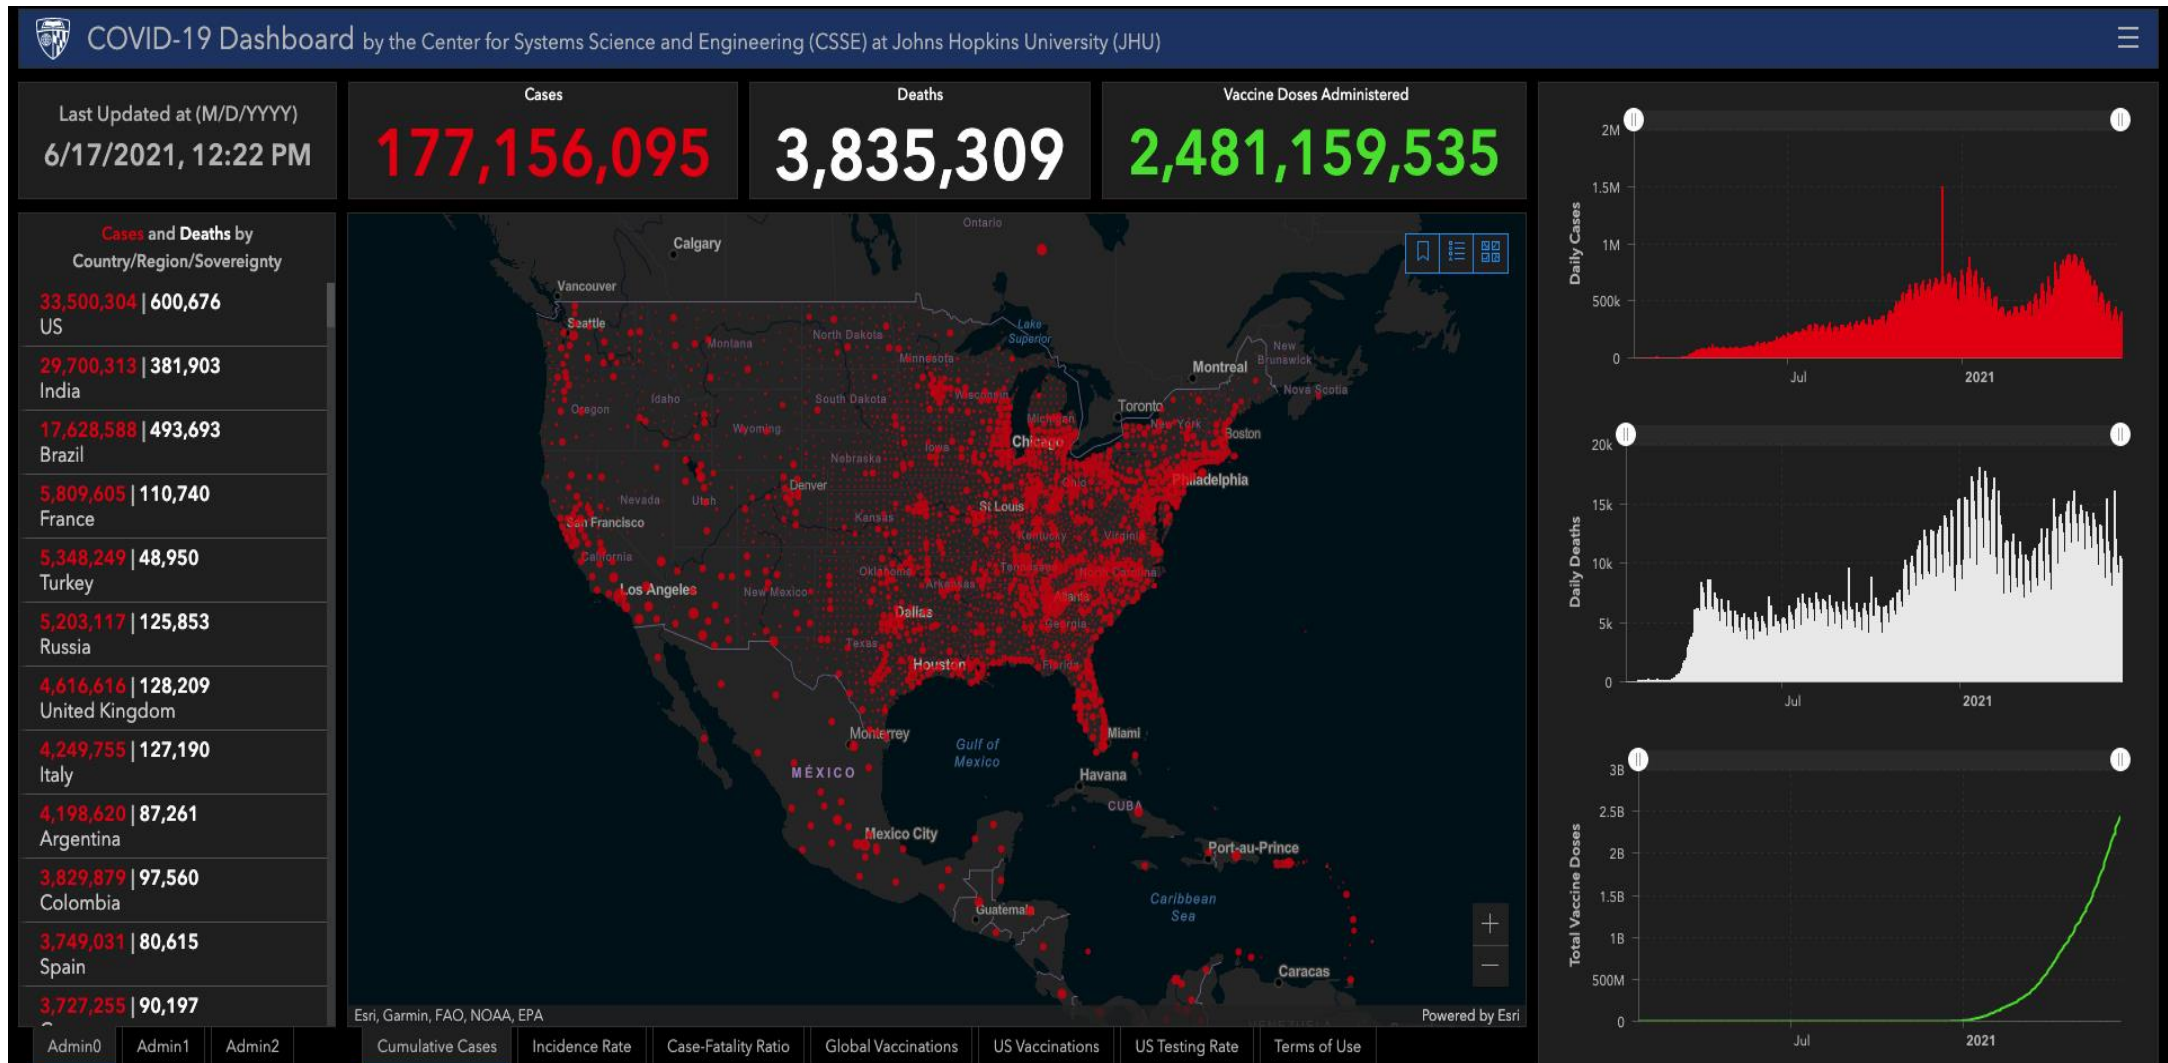

Updated June 17, 2021, with data from June 16, 2021.

Note: Case rate is based on a 7-day average with a 7-day lag. Rates of deaths is based on a 7-day average with a 21-day lag due to delays in reporting. Test positivity is based on a 7-day average with no lag. Directional change is compared to the prior 7-day period. Data is provided by the California Department of Public Health. The population denominators used for the per 100K rates come from the California Department of Finance's population projections for 2020.
